## Fuelman Program

### **NEW WF&FSA MEMBER SERVICE**

**Reduce Fuel & Maintenance by 10% and  
Get Two Cents Per Gallon Rebate**

WF&FSA and Fuelman can help you simplify the process of controlling fuel and maintenance purchases. Fuelman makes it easy to monitor spending and identify hidden costs, such as unauthorized fueling. The savings can quickly add up -- with average annual savings of 10%.

There is **no application fee** and **no annual fee**. In addition, as a member of the Wholesale Florist & Florist Supplier Association you will receive a **two-cent (\$0.02) discount** off of the posted retail price for all fuel purchases.

You'll be provided with easy to use comprehensive tracking and reporting tools. Every two weeks, you'll receive a Fleet Management Summary report to track expenses and identify abuses. Each company vehicle is issued a Fuelman card and each authorized driver is assigned a unique PIN so you'll have purchasing detail by vehicle and driver. You can even track miles-per-gallon data to identify problem vehicles.

Forget the hassle of reconciling paper receipts for accounting and tax purposes. You'll be able to quickly access your account information via Fuelman, an online application, to check account activity or make changes to your purchasing controls, all in real-time.

There are no weekly or monthly fees! You'll only pay for authorized fuel purchases. Upon approval, Fuelman will help you set up purchasing controls for your vehicles and drivers, as well as provide training and assistance to help your company get started quickly.

Fuelman has approximately 35,000 locations across the country participating in the program. If there is not a participating location near you, don't worry. Fuelman has a team that does nothing but recruit service stations into the program. They will recruit a location near you.
